

Ahmad Aqil Khairun Nadzar

Fullstack Web Developer

+6287748181259 | khairunnz123@gmail.com | Jakarta, Indonesia

[LinkedIn](#) | [Github](#) | [Portfolio](#)

I am a results-driven Fullstack Web Developer with hands-on experience in designing and deploying scalable applications. My primary specialty lies in creating dynamic and highly interactive frontends using React. Complementing this, I build robust and efficient backends utilizing Golang along with the Gin framework. I also possess a strong foundation in designing RESTful APIs and integrating them seamlessly with PostgreSQL databases. In my daily workflow, I am proficient in using Git, maintaining clean code architecture, and implementing responsive UI design. Above all, I am deeply dedicated to collaborative problem-solving and continuous technical growth to deliver impactful solutions.

Experiences

Koda Tech Academy - Bogor, Indonesia

Feb 2026 – Jun 2026

Fullstack Web Developer

Shortlink Web App | Jun 2026

- Developed a responsive link-management dashboard using React.js and Tailwind CSS, enabling users to efficiently create, copy, and manage their shortened URLs across various devices.
- Engineered a high-performance RESTful API utilizing Golang and the Gin framework to execute rapid unique slug generation and handle low-latency URL redirection.
- Implemented robust relational database operations using PostgreSQL, applying structured SQL JOIN queries to accurately retrieve and filter user-specific link data.
- Ensured data integrity and consistent system evolution by implementing database transactions and managing database schemas through secure migrations.
- Integrated JWT authentication to secure user sessions and API endpoints, and orchestrated the application services using Docker Compose to streamline the deployment process.

Tickitz Web App | Jun 2026

- Collaborated within a development team to orchestrate a robust multi-container architecture using Docker Compose, seamlessly integrating a decoupled Golang/Gin backend with a React.js frontend, alongside PostgreSQL and Redis.
- Streamlined project delivery through agile collaboration and Git version control, successfully resolving cross-functional deployment bottlenecks (e.g., Nginx reverse proxy configurations and CORS) to ensure a secure, host-agnostic environment.
- Developed a responsive, mobile-first frontend utilizing React.js and Tailwind CSS, coordinating closely with backend peers to implement state management (Redux Toolkit) for user sessions and advanced movie filtering.
- Designed and deployed high-performance RESTful APIs utilizing Golang and PostgreSQL, ensuring data integrity through automated migrations to support complex operations like movie scheduling, seat booking, and payment processing.
- Implemented a comprehensive authentication pipeline featuring email-based OTP verification and role-based access control (Admin vs. User), secured by JWT and custom Axios interceptors for automated token injection.

Ewallet Web App | Feb – Jun 2026

- Developed a comprehensive fintech dashboard for an e-wallet application, implementing a mobile-first approach for seamless cross-device responsiveness.

- Engineered a modular frontend architecture using React.js and Tailwind CSS, executing precise UI slicing to translate design mockups into interactive components.
- Implemented robust global state management utilizing Redux Toolkit and Redux Persist to securely and efficiently maintain user sessions and financial data across page reloads.
- Resulted in a highly functional, user-friendly financial interface that showcases modern frontend development capabilities.
- Integrated secure backend APIs for transaction processing and user authentication using Golang and PostgreSQL, secured with JWT.

PT Samudra Digital Network - Brebes, Indonesia

Jan 2025 – August 2025

Network Infrastructure Engineer

- Executed end-to-end fiber optic (FTTH) installations from distribution points to customer premises, configuring ONT/Routers to activate broadband and IPTV services.
- Resolved network outages by diagnosing physical layer issues, performing fiber optic splicing, and replacing faulty hardware to restore internet connectivity within strict SLA timeframes.
- Configured customer-premises equipment (CPE) and utilized diagnostic tools (Optical Power Meters) to ensure signal attenuation and bandwidth speeds met company quality standards.
- Provided frontline customer support by educating clients on basic troubleshooting steps, network security (Wi-Fi password management), and optimal router placement.
- Managed the operation and maintenance of OLT servers and core network devices, ensuring seamless data transmission between the central office and end-user premises."

CV Media Pratama Solusinet - Tegal, Indonesia

August 2022 – May 2023

Network Infrastructure Engineer

- Designed and implemented reliable internet network architectures to meet specific client connectivity requirements.
- Executed the end-to-end installation, configuration, and routine maintenance of CCTV security systems and wireless access points (hotspots).
- Collaborated with the Tegal City Communication and Informatics Office (Kominfo) to design and deliver tailored IT infrastructure solutions supporting regional government operations.
- Partnered with regional public hospitals (RSUD) to implement customized and highly reliable IT infrastructure systems tailored for healthcare environments.
- Conducted on-site troubleshooting and hardware maintenance to minimize downtime and ensure optimal network performance.

Education

Koda Tech Academy - Bogor, Indonesia

Feb 2025 - Jun 2025

Fullstack Web Developer

- Learnt front-end development practices: React Js, Redux Toolkit, Tailwind CSS
- Learnt back-end development practices: Golang, Gin-Gonic, PostgreSQL
- Basic DevOps practices: Working with WSL, Docker, and SSH for local deployment

Computer Science, Cyber Asia University

Bachelor Degree

2023 - 2027

SKILL

Frontend Development – React.js, Redux, React Query, Tailwind CSS, Material UI, HTML5, CSS3, JavaScript (ES6+), Responsive Design, Vite

Backend Development – Golang, Gin, REST API, Clean Architecture, Middleware, JWT Auth, Database Integration

Database – PostgreSQL, Redis, GORM, SQL Optimization

DevOps & Deployment – Docker, Docker Compose, CI/CD (GitHub Actions, GitLab CI), Linux CLI,

Testing – Unit Testing (React Testing Library, Jest), Integration Testing (Postman, Go test),

API Design – RESTful API, gRPC, OpenAPI/Swagger Documentation

Version Control – Git, GitHub, GitLab, Git Flow

Project Management – Agile/Scrum, Jira, Trello, Notion, Technical Documentation

Cloud & Hosting – AWS (EC2, S3, RDS), Vercel, Railway, Firebase

Security & Best Practices – Input Validation, HTTPS, OAuth2, JWT, CORS
